TRANSMISSION OIL FOR AUTOMATIC TRANSMISSIONS

Agrol ATF Dexron III is a transmission oil for automatic transmissions and torque converters in vehicles and machines.

CHARACTERISTICS

Agrol ATF Dexron III has extremely good low temperature qualities, which is necessary, for example, for electronically controlled automatic transmissions. It also has very good high temperature qualities. This results in good oxidation stability as well as very good lubrication qualities, which extends the lifetime of transmissions.

RECOMMENDATIONS

Agrol ATF Dexron III is recommended for all automatic transmissions where ATF type A, Dexron II D, Dexron II E, Ford Mercon, Allison C-4 or Caterpillar TO-2 oils are prescribed. It is also good for torque converters, boat engine sprockets, power steering, suspension units, as well as hydraulic systems where an ATF oil is recommended.

SPECIFICATONS

Analysis	Units	Results
Density at 15°C	kg/m ³	862
Flash point	°C	184
Pour point	°C	-48
Viscosity at:		
40°C	mm ² /s	35.8
100°C	mm ² /s	8.0
-40°C	Pa.s.	18
Viscosity index		184

NORMS AND TESTS

ATF	Dexron III	Voit Diva	G 607	ZF	TE-ML-09, 11, 14
ATF	Dexron IIE	Daimler-Benz	236.1, 236.5		
Ford	Mercon	Caterpillar	TO-2		
Allison	C-4	Volvo STD	97325-12, 97335-12, 97340-12
