Absol

DESCRIPTION

Used for decontamination, fire protection, slip resistance and neutralization.

CHARACTERISTICS

Absol efficiently absorbs, sanitizes and neutralizes hazardous liquids. The product also works for fire-fighting and anti-slip. Absol can be used anywhere where oil, grease, paint, solvents and acids are handled. The product consists essentially of sand, lime, cement and water. Absol does not contain any hazardous ingredients.

RECOMMENDATIONS

Absol absorbs all kinds of organic liquids. These include, for example, hydraulic, lubricating and fuel oils, greases, solvents such as paint thinner, mineral spirits and kerosene, and paint and lacquer waste. The absorbed liquid is to be treated according to the national or regional legislation regarding Hazardous Waste (in Sweden: Förordningen om farligt avfall, SFS 1996:971). If the absorbed liquid is flammable, it can be incinerated. Final product will be a harmless alkaline ash. Absorbs and neutralizes acids, absorbs alkaline substances. Prevent slipping accidents and fires.
